

Armani

Looking for a second dog for your family? Consider Armani. This excitable youngster will need a canine friend to play with in order to expend his typical teenage enthusiasm in a positive manner. He is quite adept at finding ways to amuse himself if playmates or toys are not available.

Continued positive training will be needed although Armani does walk well on the lead and will sit or lay down when asked. His Shar Pei wrinkles will require careful attention in order to minimise any skin irritations.

Armani is fantastic with other dogs but has had limited interaction with children and has not met any cats so will need monitored introductions if your family includes them. The two week trial period offered should enable you to gauge his ability to fit into your family.
